DETAILED ACTION

1. Claims 38-52 are presented for examination. Claims 1-37 have been canceled.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 38-52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 and 31 of U.S. Patent No. 6,654,921. Although the conflicting claims are not identical, they are not patentably distinct from each other because apparatus Claims 38-51 of the present application recite the different elements that can carry out the functions of method claims 1-14 of the '921 patent, and method claim 52 of the present application represents the functions that can be carried out by the apparatus claim 31 of the patent. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to implement the claimed invention because in claiming a product or a process, the process of making the product or the product to carry out the process cannot lend any patentability to an otherwise obvious product or process. *In re Pilkington*, 169 USPQ 145.
